

HEMANG BHAVASAR

AVP – Lead Data Analyst

About Me

I am a highly qualified and results-driven data analyst with over 11+ years of experience. I have a track record of using data to provide actionable insights and improve business performance.

I am skilled at interpreting complicated data sets and turning them into useful suggestions since I have a solid grasp of statistical analysis, data visualization, and data management. I'm a detail-oriented, analytical expert with experience with Tableau, Power BI, Alteryx, and GCP.

I also have a strong ability to interact with both technical and non-technical stakeholders.

Published Paper

BLOOD BATTERIES NATIONAL PAPERS (March 2010) Researchers consider sugar and human blood glucose potentially valuable sources of power because they occur naturally, are easily accessible and don't produce harmful emissions. So we can use Blood as power.

Photonic Communication through MICROMIRRORS Based on MEMS Technology NATIONAL PAPERS (August 2010) Microelectromechanical systems (MEMS) in the last decade have led to many successful components that satisfy the requirements of light wave communication networks.

Application of Dusty Plasmas for Space NASA (April 2010) Dusty plasma is an ionized gas containing dust particles, with sizes ranging from tens of nanometers to hundreds of microns. The interaction of the dust particles with the plasma and ambient environment results in a charging of the dust grains.

MEMS NANO IEEE (February 2011) Micro-Electro-Mechanical Systems, or MEMS, is a technology that in its most general form can be defined as miniaturized mechanical and electro-mechanical elements (i.e., devices and structures) that are made using the techniques of micro fabrication.

Shenkuan Zheng
A strategic and passionate leader with deep expertise in data analytics and technology operations
September 12, 2019, Shenkuan managed HEMANG directly

Hemang worked as a data analyst on my team to deliver analytics solutions using Tableau and Alteryx for more than three years.

I was extremely impressed with Hemang's Tableau skills when we worked together. Not only he can create inspiring data visualizations in Tableau, but he also finds creative technical solutions for the problems he tries to solve. Hemang is great at working with people. Our users loved to connect with him as a trustworthy consultant and advisor for the Tableau issues they need help with.

Hemang also led a project to create a data mart to track usage of our key analytics solutions. While the project faced some technical challenges at first, Hemang and his team overcame these challenges and delivered a high-quality solution that helped us to operate more efficiently.

I really enjoyed working with Hemang. His combination of technical and people skills makes him an outstanding analyst adds great value to your team! [See less](#)

Rakesh Rajendran · 1st
Country Manager- Data & Analytics Co. #1 AI Clinical Analytics Platform , Startup Founder, Failed/Learned Entrepreneur
March 26, 2023, Rakesh was senior to HEMANG but didn't manage HEMANG directly

Hemang was a consistent top performer during his tenure at Saama. He had always been at the forefront of technology, continuously upgrading himself on the latest BI stack and also training his team mates, Saamaites and client stakeholders also on the same.

Whenever there was a tough problem to be solved using Tableau or any of the other BI tools in his repertoire, Hemang was the go-to man for almost all project teams within Saama. He has also shown tremendous ownership by participating in various initiatives outside his direct responsibilities to help Saama and our people benefit.

Hemang is a wonderful addition both for his Technical Expertise as well as his Collaborative ownership attitude.

i wish Hemang all the best in his future endeavours.

We meet a lot of professionals and you get along with only few of them so well, Hemang is one of those... quite at moments. idea factory at other, his love for Visual Analytics is brilliant !! Has handled clients single handedly.

One of the guys I have seen who takes a lot of accountability for his personal learning, innovating with his own ideas. Always charms client with the style of communication he possesses. He will come out with ideas even in difficult of situations and they are always appreciated by customers. He has a knack of reading the pulse of the customer needs and come with suggestions and ideas.

Great asset to any one who employs his service.

Hemang, Keep Doing well !!

managed HEMANG directly

I have worked with Hemang for more than 3+ years. He has executed multiple projects with different level(high, medium) using BI Technology skill sets with lot of ease. Best thing I noticed about him is strong learning curve and desire to learn more. He have capable to understand the problem and giving the quick solution of the problems.

Hemang is one of the few guys I have known who is an excellent Techie with sound knowledge, skills and right attitude. I highly recommend Hemang Bhavasar not only for his technical skills, but also for his great work ethic and excellent teamwork. [See less](#)
